Cassina

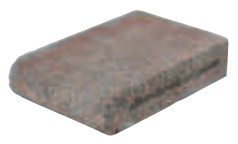

Coping Stone

Cassina coping stone is the newest addition to the Oaks product line. This bullnose coping stone is perfect for use around pools, helping to minimize abrasions and impacts, especially for children. Cassina can also be used over step treads on exposed edges where sharp corners are not desired. Available in both standard and tumbled formats and offered in four natural color choices, Cassina offers uniform blending which helps to complement any paver and add that extra bit of elegance to your project.

Finishes

The Cassina coping stone is available in two finishes. The Cassina standard has a classic straight edge and smooth bullnose whereas the Cassina Plus has a tumbled weathered finish.

Cassina Plus

Installation

Cassina coping stone is easily applied to any concrete surface with the use of a concrete adhesive, or can be mortared in place for a more distinct and traditional look. The Cassina coping stone is most desirable in high traffic areas of your outdoor living space, softening edges and corners to provide a safer space for you and your loved ones.
